SPAN

Product Description
OCS: Countertop support spacer. Consists of 3 aluminum extrusions with considerable stiffness. **While the span extrusions are extremely strong, our company does not warrant the spans to keep countertops from cracking, especially if mistreated during use. Your fabricator/installer must make the final call if there are any questions on stability across the span.**
When using an OCS with an ORP at the end of a run, be sure to select and ORP OCS part. When using an OCS with a cabine, finish the cabinet side using an OFE OCS part.

Island Insert Cabinets - IDR

Designers and builders of masonry island kitchens are now offered a complete line of door, drawer/door, drawer combinations and pullout cabinetry to construct a totally functional kitchen. The line features the optional Clean-Stor® box that attaches to door fronts to create useful storage and organization. The Clean-Stor box eliminates the infamous "masonry black hole" that lurks behind access doors. The steel construction is superior to presently used insert materials that are subject to warping, rotting and mildew. The Clean-Stor box comes with a shelf and provides clean dry storage.

Doors exhibit the same stainless quality, "heft & weight" and solid close as the modular cabinetry line allowing additional design flexibility by using both lines to create the ideal kitchen while retaining a consistent "look". Door and drawer faces can be upgraded to any door style and be powder coated to compliment your outdoor kitchen.

The insert line includes:

- One and Two Drawer Units

- Door and Drawer Combination Units

- One and Two Door (and frame) Units

- Paper Towel Dispenser

- Trash and Propane Pullouts

Access Door Inserts may be purchased with just the frame and doors or combined with the "Clean-Stor" box as a complete unit.
